GUIDES FOR EVERYTHING

AI Tools, Connectors & MCP Directory

Hundreds of AI tools, connectors, and MCP servers, sorted by category, each with a plain-English description and a price label

This directory is a map of the AI landscape as it stands in October 2026: chat assistants, coding and vibe-coding tools, image, video, audio, writing, research, productivity, business, automation, agents, developer infrastructure, connectors, and MCP servers.

Every entry has a one-line description and a **price label**, so you can scan a category, spot what fits, and try it the same afternoon.

HOW TO READ THIS MANUAL

- **Tip** — a shortcut or good habit.
- **Note** — useful background.
- **Warning** — easy to get wrong.
- **Danger** — can lose data, money, or access.
- `$ command` — text you type, exactly as shown.
- Settings › Privacy — a menu path to click.

New words appear in **bold** the first time and are collected in the Glossary at the back.

Price labels and product details were checked against vendors' sites and public information in October 2026. The AI market changes weekly. Products get renamed, acquired, re-priced, or shut down, so always confirm on the vendor's site before you buy. Inclusion is not an endorsement.

How to Use This Directory

The three price labels

LABEL	MEANING
FREE	Free to use. Often open source. There may be optional donations, self-hosting costs, or paid cloud versions, but the core product costs nothing
FREEMIUM	A genuinely useful free tier or free plan, with paid upgrades for more usage or features
PAID	Requires a paid plan (sometimes after a short free trial)

For **connectors** and **MCP servers**, the label reflects what it costs *you* to use, including the service it connects to. An open-source server for a paid service is labeled by the service.

Tips for exploring

- **Start with the free tier.** Most tools let you try before you pay.
- **One tool per job.** Pick a favorite in each category rather than subscribing to everything.
- **Check privacy settings** before uploading personal or work data.
- **Watch for bundles.** Many AI features now come inside things you already pay for (Google, Microsoft, Notion, Adobe, Canva).

CHAPTER 13

Connectors

Connectors link an AI assistant to the apps you use, so it can read and act in them. Claude calls them *connectors*, ChatGPT calls them *apps*, and Gemini calls them *extensions* or *apps*. Many are built on MCP. Availability differs by assistant and plan, so check each assistant's connector directory (in Claude: `Settings` › `Connectors`).

13.1 Productivity and files

CHAPTER 14

MCP Servers

MCP servers extend any MCP-compatible AI app (Claude, ChatGPT, Cursor, VS Code, Claude Code, Gemini CLI, n8n…). “Remote” servers are web addresses you sign in to; “local” servers run on your computer. See the *MCP* manual for setup, and prefer official servers from the vendor.

14.1 Official reference servers

SERVER	WHAT IT DOES	PRICE
Filesystem	Read and write files in folders you choose (local)	FREE
Fetch	Fetch web pages and convert them to text (local)	FREE
Git	Read and work with local Git repositories (local)	FREE
Memory	A knowledge-graph memory the AI can store facts in (local)	FREE
Sequential Thinking	Structured step-by-step problem solving (local)	FREE
Time	Time and time-zone conversion (local)	FREE
Everything	Test server showing every MCP feature (local)	FREE

14.2 Developer tools and code

SERVER	WHAT IT DOES	PRICE
GitHub MCP	Repos, issues, PRs, Actions, code security (remote and local)	FREEMIUM
GitLab MCP	Issues, merge requests, and pipelines	FREEMIUM
Context7 (Upstash)	Up-to-date library documentation for coding agents	FREEMIUM
Chrome DevTools MCP (Google)	Debug and inspect pages in a live Chrome	FREE
Playwright MCP (Microsoft)	Drive a real browser: click, type, screenshot	FREE
Microsoft Learn MCP	Search official Microsoft documentation	FREE
AWS Labs MCP servers	Docs, CDK, cost, and service tools for AWS	FREEMIUM
Azure MCP, Google Cloud MCP	Manage cloud resources by conversation	FREEMIUM
Cloudflare MCP	Workers, DNS, logs, and docs	FREEMIUM
Vercel MCP, Netlify MCP	Deployments, logs, and project settings	FREEMIUM
Docker MCP Toolkit	Catalog and gateway of containerized MCP servers	FREE
Kubernetes MCP	Inspect and manage clusters	FREE
Terraform MCP (HashiCorp)	Registry docs and infrastructure workflows	FREE
Sentry MCP	Error and issue investigation	FREEMIUM
Datadog, Grafana, Honeycomb MCP	Observability queries, dashboards, and alerts	FREEMIUM
PagerDuty MCP	Incidents and on-call	PAID
Figma Dev Mode MCP	Design context for code generation	FREEMIUM
Shopify Dev MCP	Shopify API docs and schema help	FREE
Stripe MCP	Payments data, docs, and actions	FREEMIUM
Desktop Commander	Terminal, files, and processes on your computer (community)	FREE
Serena	Semantic code search and editing for agents (community)	FREE

14.3 Data and databases

SERVER	WHAT IT DOES	PRICE
Supabase MCP	Manage projects, run SQL, and generate types	FREEMIUM
Neon MCP, PlanetScale MCP	Serverless database management	FREEMIUM
MongoDB MCP	Query and manage MongoDB and Atlas	FREEMIUM
Redis MCP	Work with Redis data	FREEMIUM
MCP Toolbox for Databases (Google)	Secure database tools for Postgres, BigQuery, and more	FREE
Snowflake, Databricks MCP	Query warehouses and lakehouses	PAID
ClickHouse MCP	Analytics queries	FREEMIUM
Pinecone, Qdrant, Chroma MCP	Vector search and memory for agents	FREEMIUM
Elasticsearch MCP	Search and analytics	FREEMIUM
Airtable MCP	Bases, tables, and records	FREEMIUM

14.4 Productivity and business

SERVER	WHAT IT DOES	PRICE
Notion MCP	Search, read, and write pages and databases	FREEMIUM
